CONSERVATION
DISTRICTS**

Western Iowa No-Till Issues

Soils in western Iowa are highly erodible, making soil stewardship a key issue as farmers plan their operations from year to year. At this daylong event, specialists and practicing no-till farmers will address current issues, such as managing planter settings in heavy residue areas, use of cover crops to improve soil structure, current marketing trends and long term weather outlook. Keynote speaker Paul Jasa will discuss techniques for success in long term no-till systems for a corn/bean rotation as well as continuous corn on corn. Whether looking for ideas to reduce tillage impact or a long-time no-till farmer, local growers are invited join us for a day of learning, conversations and networking with fellow producers. A free lunch will be served and CCA Credits will be available to attendees.

2012 Keynote Speaker:

Paul Jasa
UNL Extension Engineer

2012 Program Presenters:

Sarah Carlson
Practical Farmers of Iowa

Steve Killpack
Western Iowa No-Till Farmer

Elaine Kub
Market Analyst, Ag Risk Consulting Group

Bryce Anderson
DTN Ag Meteorologist/Analyst

Jamie Scott
No-Till Farmer and Cover Crop Seed Dealer, Indiana
